

- c) mounting the image capture device as a disk on the host computer; and
 - d) opening the Internet page description file in a web browser on the host computer,
- wherein the images stored in the image capture device are displayed on the host computer through the web browser without the need for loading camera-specific communication software onto the host computer.

13. (Amended) A computer-readable medium containing program instructions for viewing images from a digital camera on a host computer, the program instructions for:

- a) automatically generating in the image digital camera an HTML file that references the images stored in the digital camera;
- b) establishing a Universal Serial Bus (USB) connection between the digital camera and the host computer; and
- c) identifying the digital camera to the host computer as a mass storage device class whereby the digital camera appears to the host computer as a disk, thereby allowing a user to open the HTML file in a web browser on the host computer, wherein the images stored in the digital camera are displayed on the host computer through the web browser without the need for the user to load communication software onto the host computer.
